

CompTIA Network+ helps develop a career in IT infrastructure covering troubleshooting, configuring, and managing networks.

Network+ ensures an IT professional has the knowledge and skills to:

- Design and implement functional networks
- Configure, manage, and maintain essential network devices
- Use devices such as switches and routers to segment network traffic and create resilient networks
- Identify benefits and drawbacks of existing network configurations
- Implement network security, standards, and protocols
- Troubleshoot network problems
- Support the creation of virtualized networks

CompTIA Network+ (N10-006) English retires 8/31/18; Other languages retire 1/31/19.

The new CompTIA Network+ N10-007 exam is available as of March 2018. More information on both versions of the exam is available in the Exam Details below.

What Skills Will You Learn?

Networking Concepts

Explain the purpose of a variety of networking concepts and implement them appropriately

Infrastructure

Determine & explain the appropriate cabling, device and storage technologies

Network Operations

Use best practices to manage the network, determine policies & ensure business continuity

Network Security

Summarize physical security & common attacks while securing the wired and wireless network

Network Troubleshooting & Tools

Explain the network troubleshooting methodology & appropriate tools to support connectivity & performance

Companies that trust CompTIA Network+ include

BlueCross BlueShield

Canon

RICOH

Jobs that use Network+

Junior Network Administrator

Computer Technician

Network Field Technician

Help Desk Technician

Junior System Engineer

System Engineer

IS Consultant

Network Support
Specialist

Network Field Engineer

Network Analyst
